

FLEXSHUTTLE PAINTS & COATINGS

Fully Automated Solution for Paints & Coatings
Development and Quality Control

FLEXSHUTTLE is the step-changing solution for product development and quality control workflows.

The modular design enables significant efficiency increase combined with high quality and maximum ease of use.

Design your automated laboratory

Navigate on the system with shuttles

Model, execute and control multiple workflows

KEY BENEFITS

Increase throughput

Optimize costs

Enhance reproducibility and quality

Reduce time to market

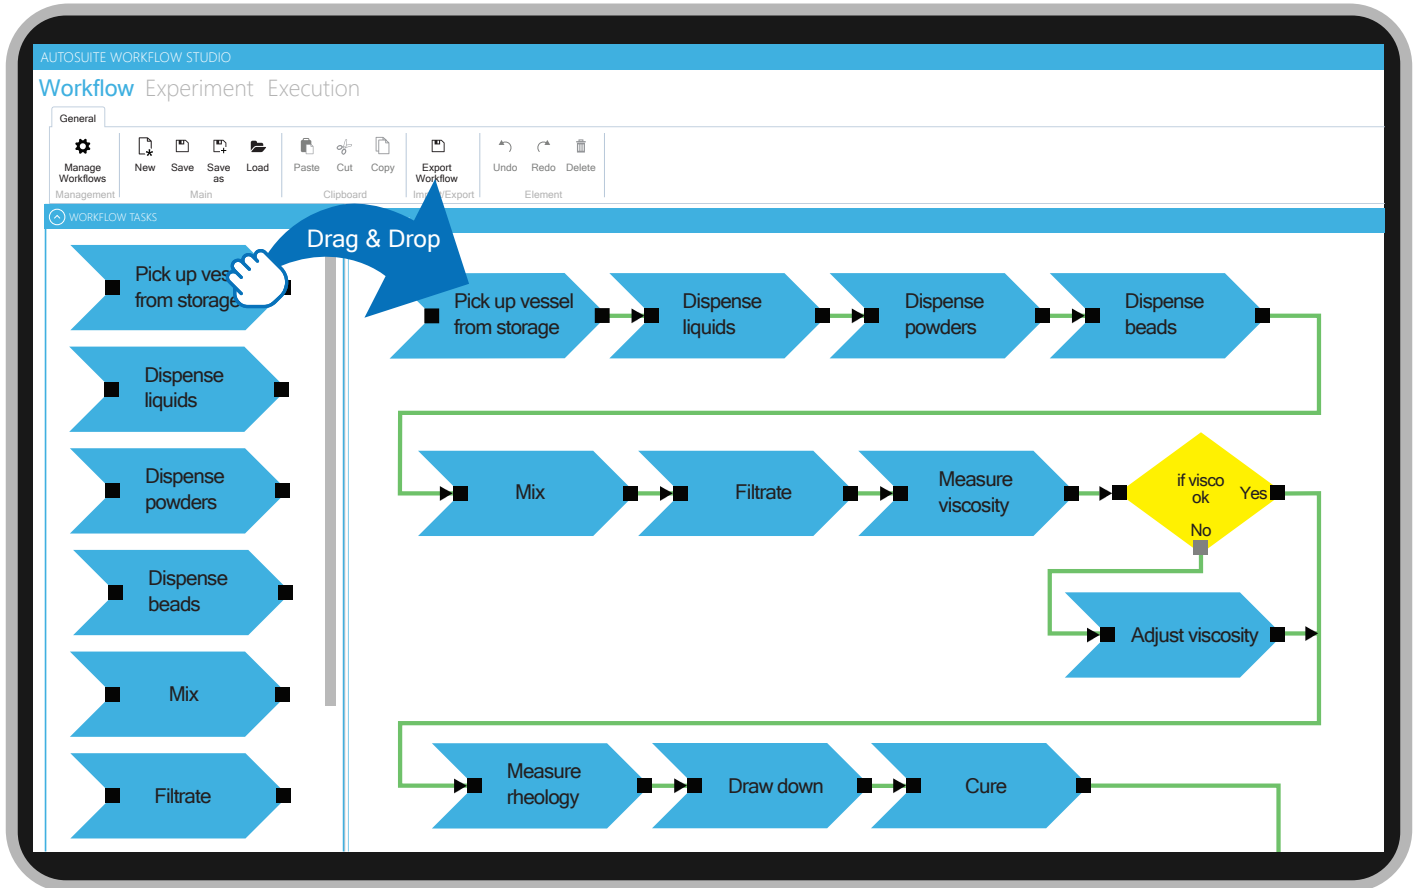

Reduce raw material consumption and waste

Boost innovation

FEDERATED SOFTWARE SOLUTION

ARKSUITE workflow management software enables quick design, execution, analysis and reporting.

KEY FEATURES

Create workflow templates

Interact with 3rd party systems

Make decisions at any time

Import / export run data

Tweak any parameter

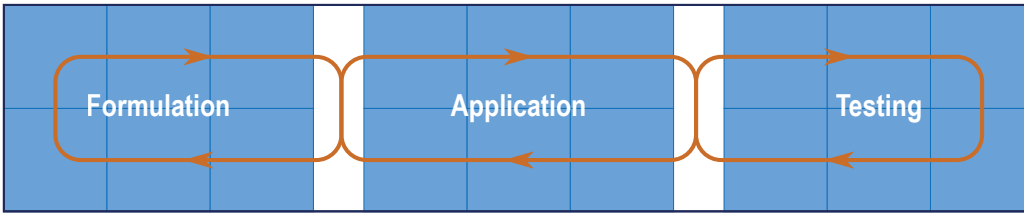

Integrate with LIMS or ELN

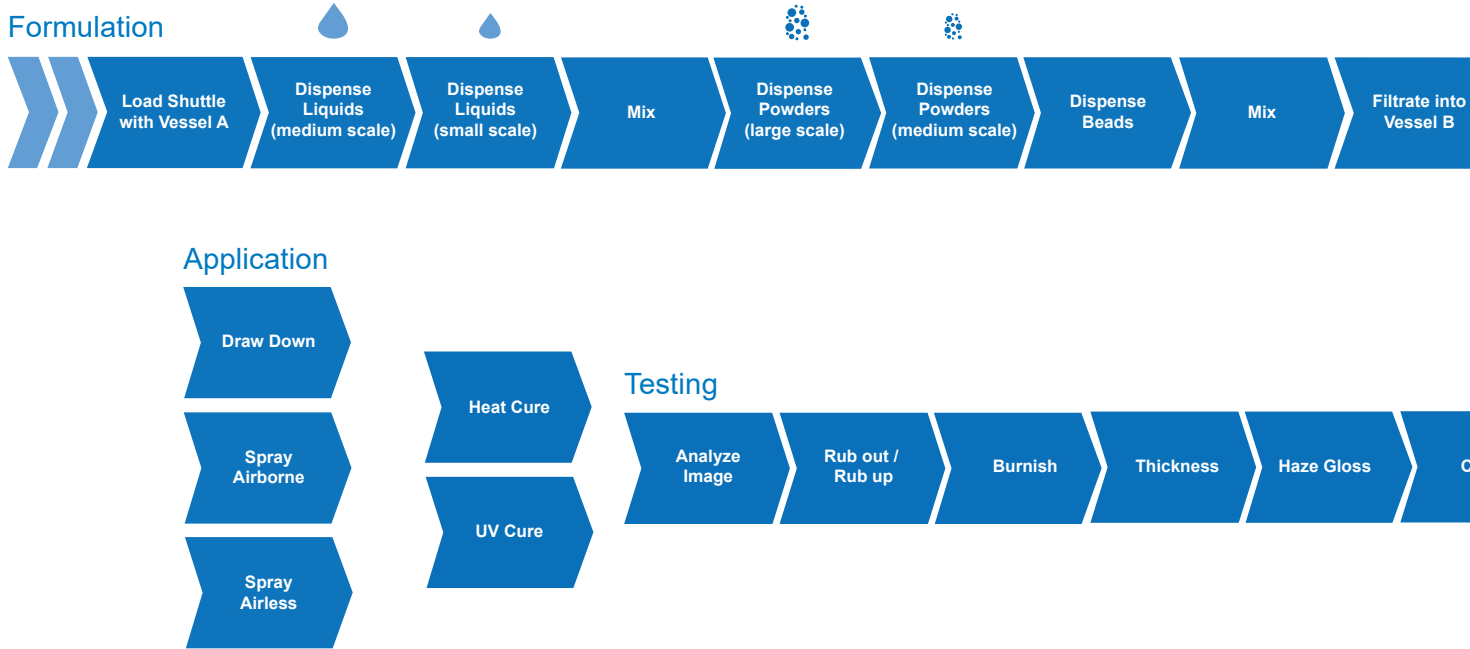

Track samples with barcodes

FLEXSHUTTLE PAINTS & COATINGS SCHEMATIC VIEW

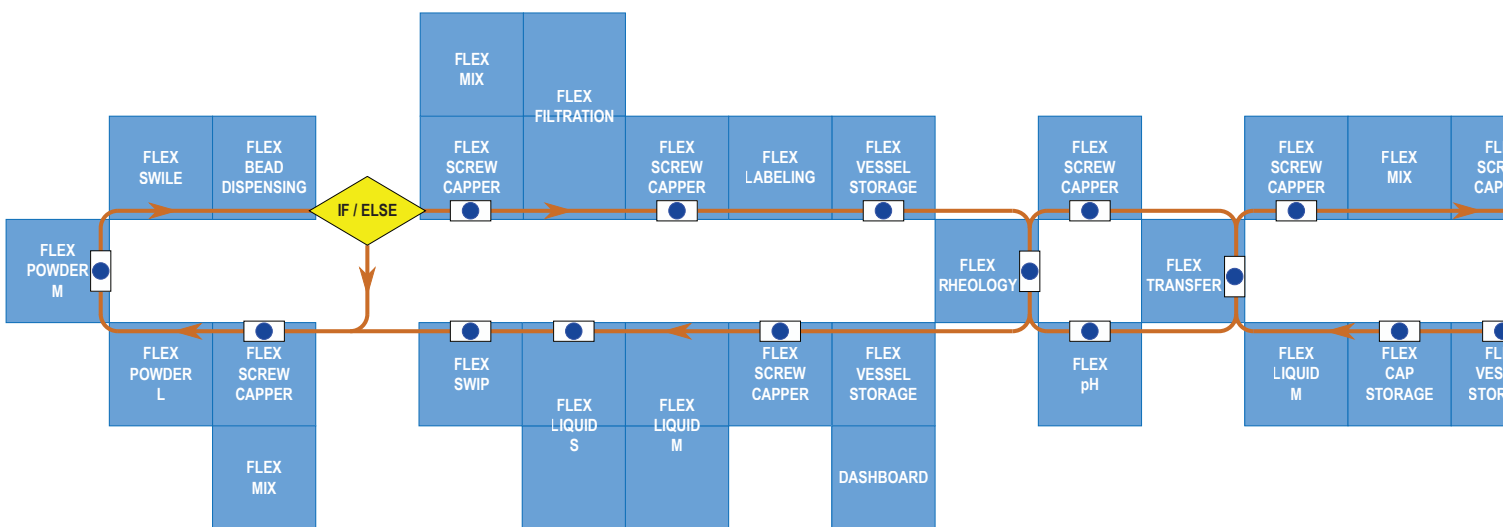

EXEMPLARY WORKFLOW FOR UP TO 200 SAMPLES PER DAY

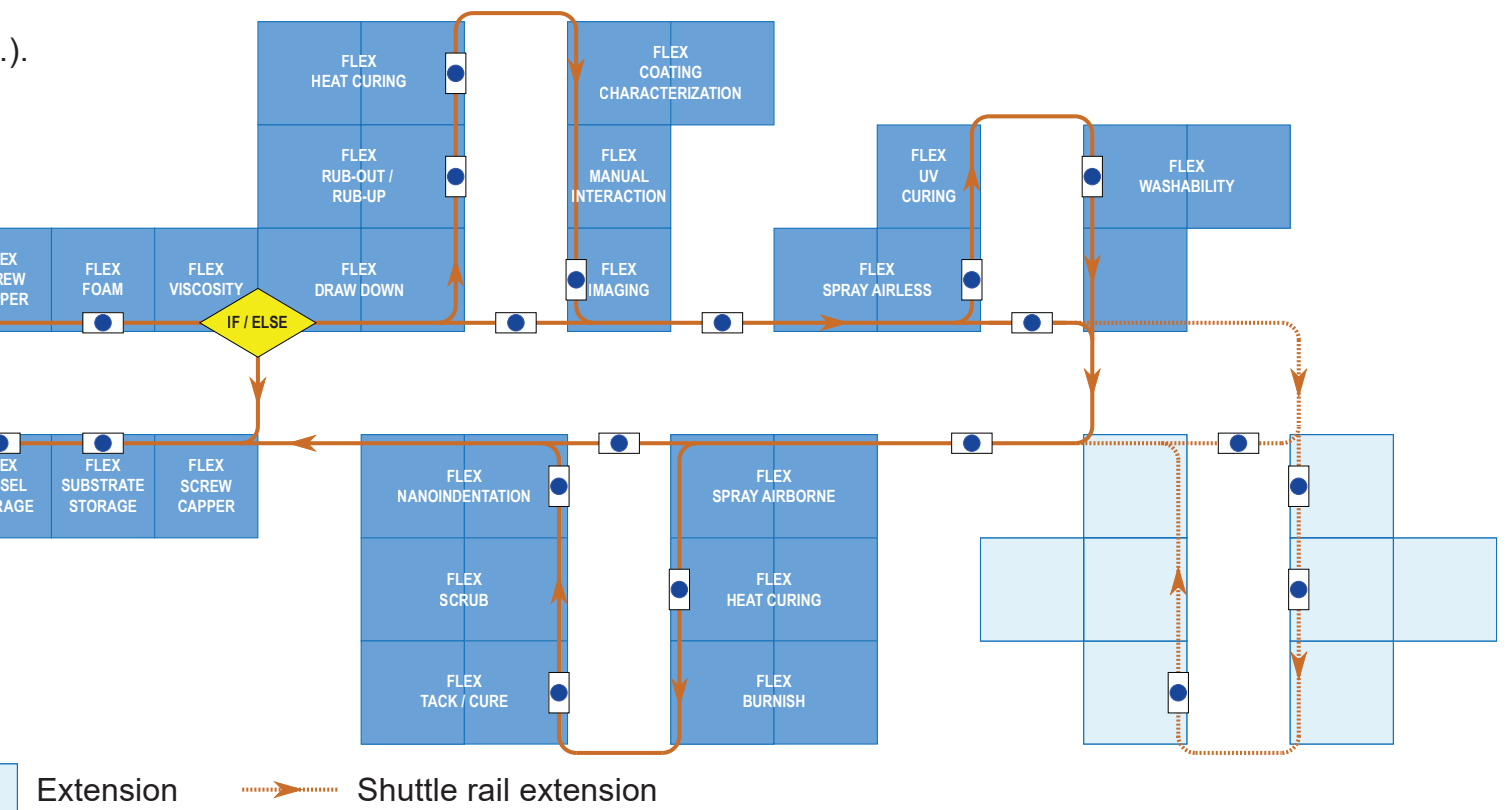

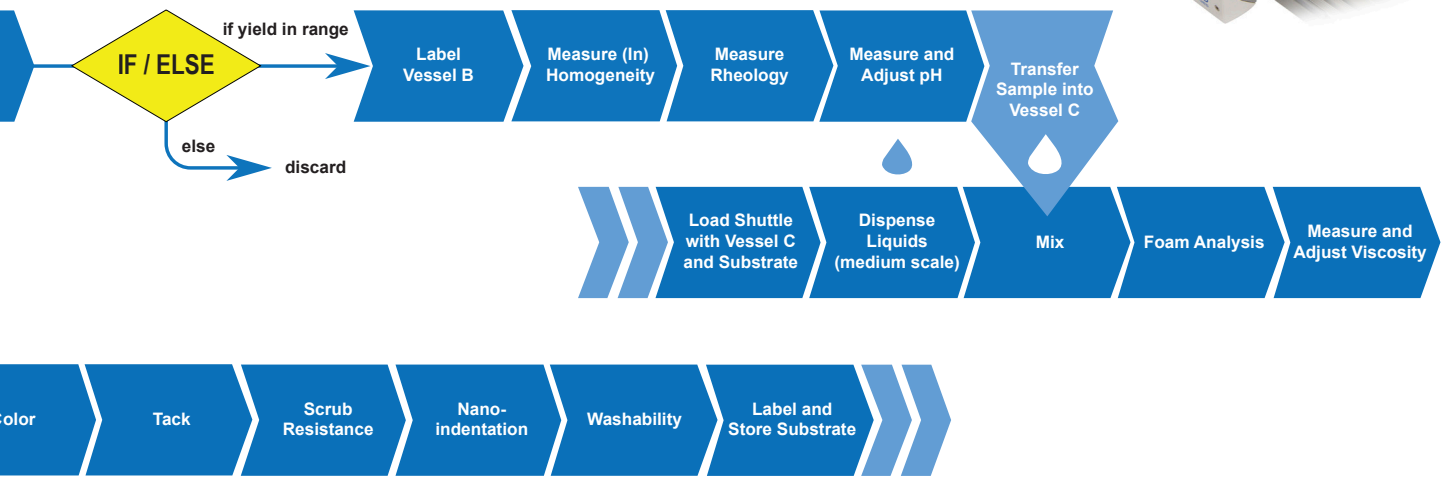

EXEMPLARY LAYOUT (MODULAR ACCORDING TO YOUR LABORATORY SIZE)

Easily expanded at virtually any time (higher throughput, modified specifications, features, workflows, etc)

Flex module Shuttle Shuttle rail

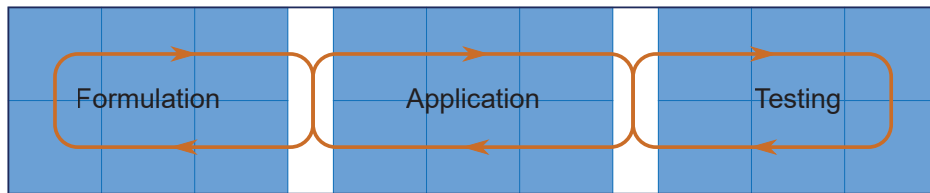

MEET DIFFERENT NEEDS WITH ONE CONCEPT

Bring different departments, ideas and knowledge together for a cost-effective fully automated solution.

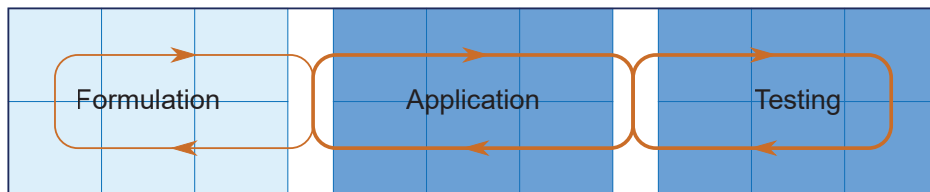

Research & Development

Screen raw materials and process parameters.
Develop and optimize formulations.
Characterize and test formulations and coated substrates.

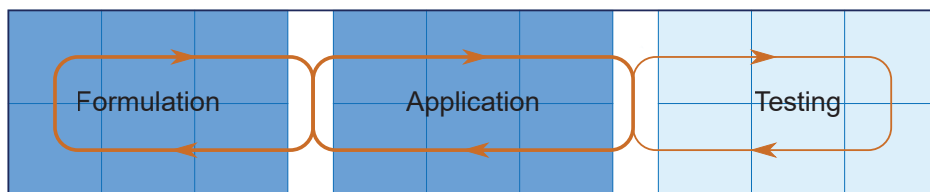

Quality Control

Complete formulation, apply and characterize / test samples for final release of production batches or production control.

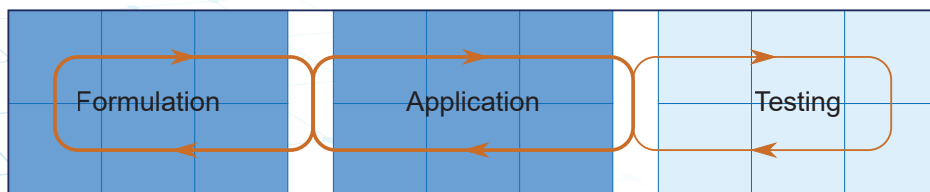

Procurement

Evaluate / validate raw materials suppliers.

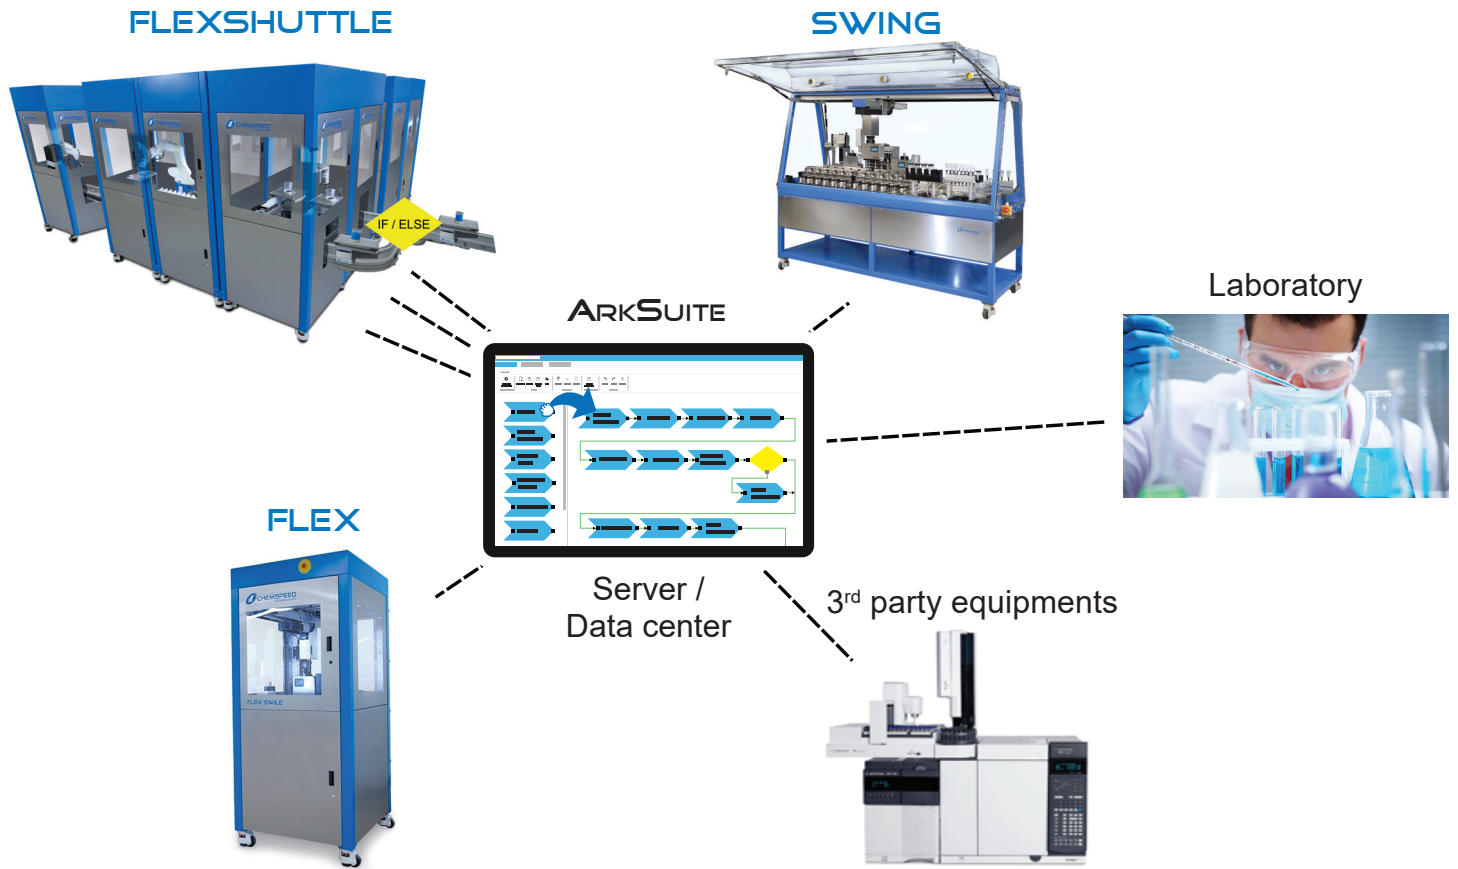

Marketing

Produce paint samples and coated substrates for your customers.

BUILD UP YOUR FEDERATED LABORATORY

Orchestrate laboratory tasks across many systems with **ARKSUITE** software. Perform independent workflows and link them by central data management.

Virtually connect systems located anywhere

Manage experiments, inventory and results

Design and execute dynamic workflows

Pilot all systems centrally

Swiss Quality Products
An International Team of Highly
Experienced Chemists

More than 20 Years of Experience in
Automated Experimentation
Customized Workflow Solutions

Chemspeed Technologies is the leading provider of high-throughput and high-output research & development workflow-solutions from single bench-top / standalone automated workstations (powder dispensing - sample preparation - synthesis - process development - formulation - application - testing) up to complete and integrated product development workflows for the entire product development processes in the chemical, material science, renewables & energy, pharmaceutical, agrochemical, specialty chemical, home care, cosmetics and nutrition industries, as well as academia.

Chemspeed Technologies offers hardware and software
for every step in the product development cycle
